GETTING TOGETHER FOR SOME CHRISTMAS FUN

Thanks to Al Burke, WB9SSE, Tom Rupp, KU8T, and Jim Pliett K9OMA for the photos of the FWRC and ACARTS Christmas dinners.

There are more photos in this newsletter on pages 2, 3, 5, and 9. Plus, check out the ones on the FWRC web page.

Happy New Year

ACARTS PRESIDENT'S MESSAGE

As a new year begins, the Board of ACARTS desires to keep the momentum going that started in 2017 by providing the members with interesting meeting topics and activities. The Hamfest has been approved by the ARRL to be the Central Division convention. This will provide more activities and, best of all, exposure throughout the Division, which consists of the 9th call area, or the states of Indiana, Illinois, and Wisconsin. To start the year off, the January meeting on the 16th, will be a presentation by Ward Hall, WC0Y, who will talk about new trends in light-weight portable and backpack operation of ham radio, including examples of radios and antennas. These trends apply to operating from parks, backpack trails, and summits. Ward will include a description of the Summits on the Air (SOTA) awards program and activi-

ties. Plan on attending to pick up some tips on what to carry and what to leave at home when you want to take a rig with you.

The ACARTS Christmas dinner was another success. It was attended by 33 members and guests, all of whom enjoyed an evening of good food and conversation. We get to do it all over again at the Spring Banquet in April.

I hope to see you at one of the meetings this year. I hope that we will have a program that interests you. Better yet, let me know what kind of program you want, and we will do our best to accommodate you.

73,

Dave Lindquist, W9LKH

President

ACARTS DECEMBER 2017 BOARD MEETING MINUTES

Dave announced that the December meeting would be the Christmas Dinner, to be held at 7:00 p.m. on December 19th at Hall's Guesthouse. He added that the January meeting would be a presentation on Summits on the Air by Ward Hall, WC0Y, and that the February meeting would be the annual SKYWARN training at the Public Safety Academy.

Joseph, K9RFZ, asked if one person could receive multiple meal tickets if they

worked more than one day. Jim, KB9IH, replied that that has always been the policy, and saw no reason to change it.

A discussion was held on possible meeting topics for 2018. A question was raised as to whether ACARTS would continue responsibility for the FM Simplex contest in 2018. Joseph, K9RFZ, said that he would check with Jim, KB9WWM, to see if ARES would again resume control of the contest, or if ACARTS should plan on holding it.

January 16: Ward Hall, WC0Y, will provide a presentation on taking a rig backpacking and Summits on The Air (SOTA).

Unless otherwise scheduled, all General meetings are held at 7:00 PM at the Red Cross Center, 1212 E California Rd, Fort Wayne, IN. Board meeting are held at the Salvation Army Facility.

The topic of the annual charity donations was raised. Howard, N9ADS, proposed giving \$500.00 each to the Red Cross, the Salvation Army, and the Community Harvest Food Bank. Bob, N9PWM, made a motion to make the donations as Howard recommended. The motion was seconded by Bernie, K9JDF, and passed by a voice vote.

The meeting was adjourned at 8:35 p.m.

ACARTS CHRISTMAS DINNER 2017

ACARTS Christmas Dinner on Dec 19, at the Guest House on Washington Center Road photos provided by Tom Rupp KU8T.

Carl Luetzelschwab, K9LA

The upcoming DXpedition to 3YØZ Bouvet in early 2018 is an important one to get worked and confirmed since it's currently #2 on the DXCC Most Wanted List at ClubLog:

<https://secure.clublog.org/loginform.php>

It may be years before another operation takes place.

In addition to 3YØZ, there are many other DXpeditions to DXCC entities that you may need. How do you determine when the best time is for you to work them? You can roll your own propagation predictions or go to the web site of the DXpedition as many have propagation info.

Another way is to visit:

<http://www.voacap.com/dx.html>

This web site has VOACAP predictions for many DXpeditions, and is offered by Jari OH6BG, James HZ1JW and Juho OH8GLV. You input your 6-character grid square, and predictions to all the listed DXpeditions are calculated. As an example, here are the predictions for the Ft Wayne area (specifically EN71kf) to 3YØZ.

The color-coded percentages, in simple terms, indicate the probability of making a QSO on the desired band at the desired time. For your best shot, concentrate on the yellow-orange-red blocks.

The predictions assume the DXpedition has a 3-ele Yagi at about 30 feet on 20m thru 10m and a quarter-wave vertical over good ground on the low bands. On your side, a 3-ele Yagi at about 60 feet and a quarter-wave vertical over good ground are assumed. The transmit power for both the DX station and you is 1.5 kW.

3YØZ AND OTHER DXPEDITIONS

Having a more modest station than the above assumptions means you may not in reality have any yellow-orange-red blocks, but the colors will still indicate the highest probabilities.

By hovering your cursor over any block gives the color-coded probability, the estimated monthly median signal power in dBW (add 30 to get to dBm) and the probability that the operating frequency is below the MUF (maximum useable frequency).

Also, hovering over the TX block in the second-to-last row at the bottom gives your sunrise and sunset times. Likewise, hovering over the RX block in the row at the very bottom gives the DXpedition sunrise and sunset. The concurrent TX and RX blocks that are dark tell you how much common darkness (when the entire path is in the dark ionosphere – best for low band propagation) exists along the

path. For example, our path to Bouvet has about 7 hours of common darkness.

Finally, long path predictions are also given. Make sure you check long path, as there may be some DXpeditions that favor long path.

I hope these predictions help you increase your DXCC totals.

NASA ON THE AIR

2018 is a big year for NASA anniversaries and we'd like for you to help us celebrate. NASA was created in 1958, the first manned lunar mission was in 1968, and the first elements of the International Space Station (ISS) were launched in 1998. The club stations at the various NASA centers and facilities plan to be on the air with special events to celebrate these milestones and we are offering commemorative QSL cards and a special certificate indicating how many centers you worked on various bands and modes may be downloaded. QSL instructions are available on the QRZ.COM site for each individual club station. We plan to have a web-based system for you to check your points total and download a certificate at the end of the event in December 2018. Points will be awarded for each center worked on each band and mode (phone, CW, digital).

There are Amateur Radio Clubs at several NASA centers. This year we gather together to highlight NASA milestones the way we do it best, through radio. Our clubs are made up of civil servants, contractors, and tenants. Some clubs are large and well supported some are small and struggle. But we have a common goal to show our support to NASA and highlight some amazing accomplishments.

The event will run from December 2017 through December 2018. There will be special event operations by the various centers commemorating specific events. All operating modes are fair game including satellites, repeaters, EME, ISS APRS, etc. We hope to be on the air for casual contacts and contests as well.

Please check for updates as the program is developed.

NASA Centers Participating:

THE ARRL INTERNATIONAL GRID CHASE

by Bart Jahnke, W9JJ, ARRL Contest Branch Manager [from December 2017 QST, page 92]

Get ready to kick off 2018 with a new year-long operating event!

You may not know this, but your station is in a Maidenhead grid square. The entire world is divided into thousands of these 1° latitude × 2° longitude squares, each one with a unique designation. They're all part of a geographic location system adopted in the 1980s at a meeting of the VHF Working Group in Maidenhead, England.

Unless you are a VHF enthusiast, this nugget of information may not mean much. But at 0000 UTC on January 1,

2018, the global Amateur Radio community will be very interested in grid squares.

For more information on grid squares see

www.arrl.org/grid-squares

www.arrl.org/international-grid-chase-2018#announcement

WINTER FIELD DAY IS JUST AHEAD

Field Day is not just for summertime anymore. Winter Field Day, sponsored by the Winter Field Day Association (WFDA), will take place over the January 28-29 weekend, and it can be a terrific time to prep for ARRL Field Day in June. The annual event's stated purpose is to encourage emergency operating preparedness in the winter, but it's also an excuse to get out of the house and enjoy the great outdoors. According to the WFDA, getting ready for emergency communication in a winter environment is just as important as the preparations and practice that take place each June during ARRL Field Day, and — let's face it — it's not cold and snowy everywhere during the winter months. Your local climate could be quite the opposite.

"Don't let those winter doldrums keep you locked up in the house," the WFDA says. "Get out and play some radio!" The WFDA said it believes that maintaining

operating skills should not be limited to fair-weather scenarios.

The event, which got its start in 2007, is not restricted to North America. All Amateur Radio operators around the world are invited to participate, and there are three entry categories — indoor, outdoor, and home. The rules are similar to those for ARRL Field Day. Operation will take place on all HF bands except 12, 17, 30, and 60 meters, as well as on VHF, UHF, and satellite. The event runs 24 hours. US and Canadian stations exchange call sign, operating category, and ARRL or RAC section.

The WFDA encourages both group and solo operation, and if you're not up for an outdoor winter adventure involving Amateur Radio, you can operate from the comfort of your shack. As the WFDA says on its Facebook page, "The object is winter fun!"

Monday			8:00 PM	146.685-	Huntington ARES
8:00 PM	224.780-	Fort Wayne 224 Net			

1. All times local time. **Any changes or corrections should be submitted to the newsletter editor at AB9ZD (at) ARRL.NET.**
2. On 145.530 @ 1200 baud. Use unconnected converse mode to communicate for a roundtable net setting. Use your "UNPROTO" command or equivalent to set Digi path(s) through the strongest station(s) needed between you and your destination. Only use those that are necessary! Have all your "Monitor" settings on so you can see everyone.
3. 1st and 3rd Thursday, Reflector REF024B.
4. Net starts using BPSK-31 and switches to BPSK-250 after roll call to pass traffic etc. NBEMS suite of software (FLDIGI, FLMSG, and FLAMP) is preferred.
5. Indiana HF Traffic Nets Web Site: <http://www.inarrl.org/index.php/public-service/indiana-nts>
